Foundation Skills in Hospital Pharmacy

Study day

Time: 9.30am – 5.00pm

Venue: Wellington Regional Hospital

(Details upon registration)

This case-based, practical workshop is aimed at pharmacists starting their career in the hospital pharmacy setting and is ideal for those who are newly qualified or have recently moved from community into hospital.

It will focus on developing their ability to

- Review a patient's medication regime effectively and efficiently
- Identify, prioritise and resolve medicine related issues
- Utilise information from different sources to support decision making
- Develop critical thinking skills
- Communicate decisions effectively

To ensure the focus remains on medication review skills, the study day will not include teaching on medicine history taking or medicines reconciliation.
