Pharmacists and Technicians in an aseptic production unit are experts in preparing sterile, custom medications in a highly controlled, contamination-free environment. They are essential for ensuring that complex, patient-specific products like chemotherapy, intravenous nutrition, and clinical trial drugs are safe and effective. As well as manufacturing items the aseptic production unit team are often involved with placing orders to companies to manufacture and send the chemotherapy to the treatment site.

## **ASEPTIC PRODUCTION**

## **PHARMACY**

## **TEAM**

### **Key responsibilities**

- Custom medication preparation
- Quality assurance and control
- Prescription verification
- Supervision and training
