Clinical Pharmacy Technicians are at the heart of patient-centred care in hospital. They work closely with pharmacists, nurses, and doctors to ensure every patient receives the right medicine, in the right way, at the right time.

What they do:

Each day is different: from taking medication histories and managing medicines, to counselling patients and supporting clinical audits that enhance safety and quality. Patient counselling includes counselling on warfarin, inhalers, renal transplant and stem cell transplant medicines

CLINICAL PHARMACY TECHNICIAN

Skills:

- Effective communication
- Attention to detail
- Teamwork
- Medicine safety awareness
- Organisation
- Education and mentoring
